Rooms seems to be working well

Teachers and staff seem to be working well

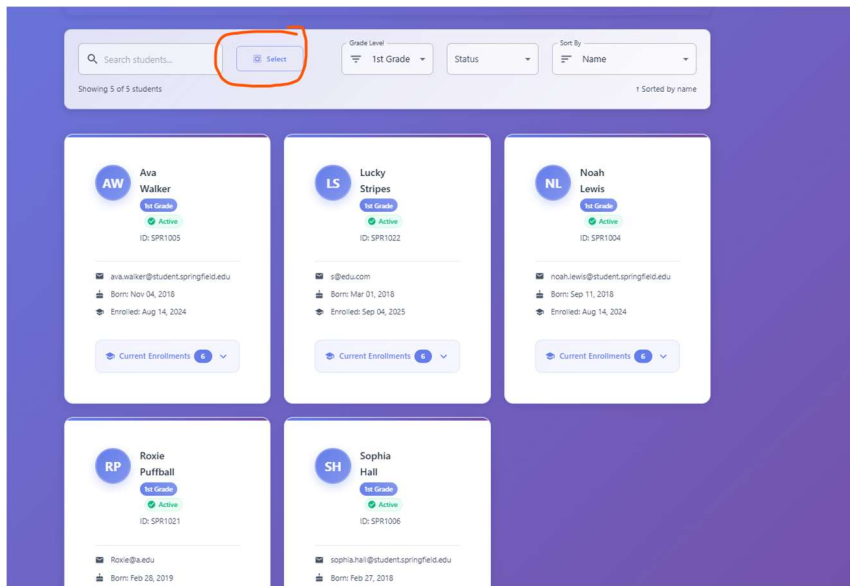

Names of the classes are showing up but the display sucks (need to fix at some point)

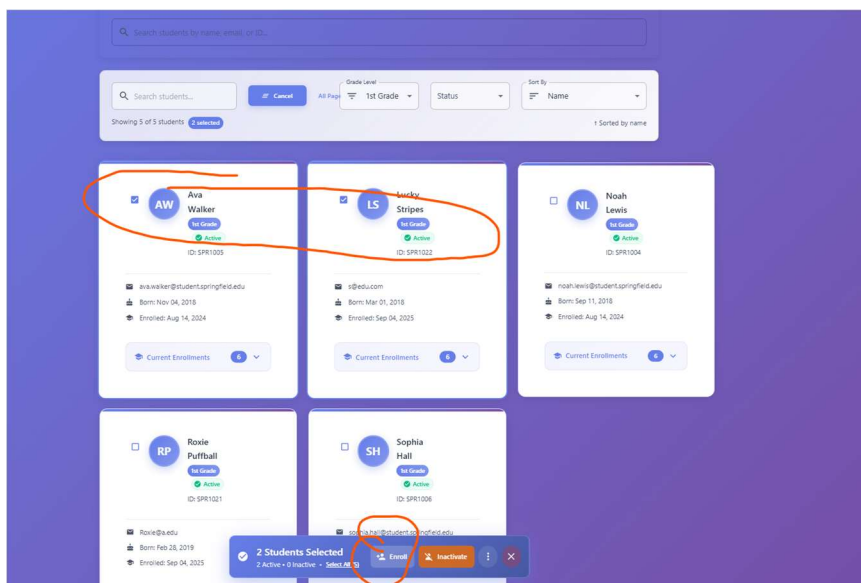

Enrollment for normal classes needs some help.

Steps:

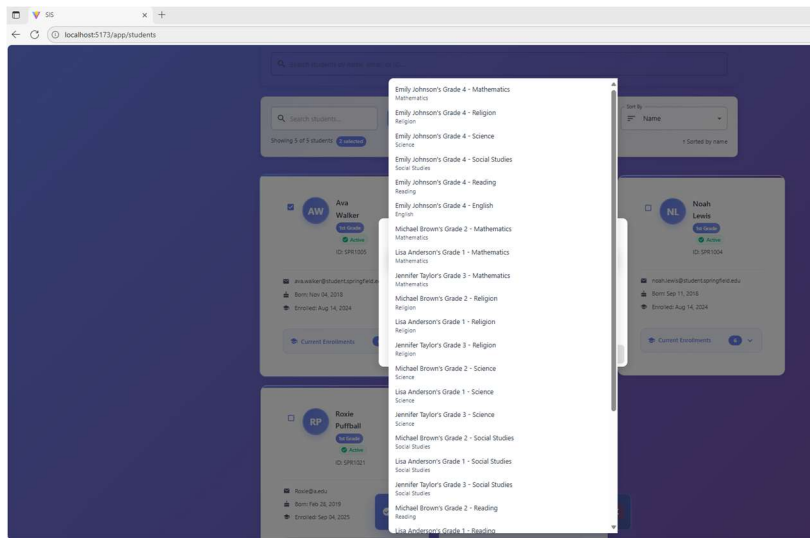

Click on Select

Select students to enroll and Hit enroll

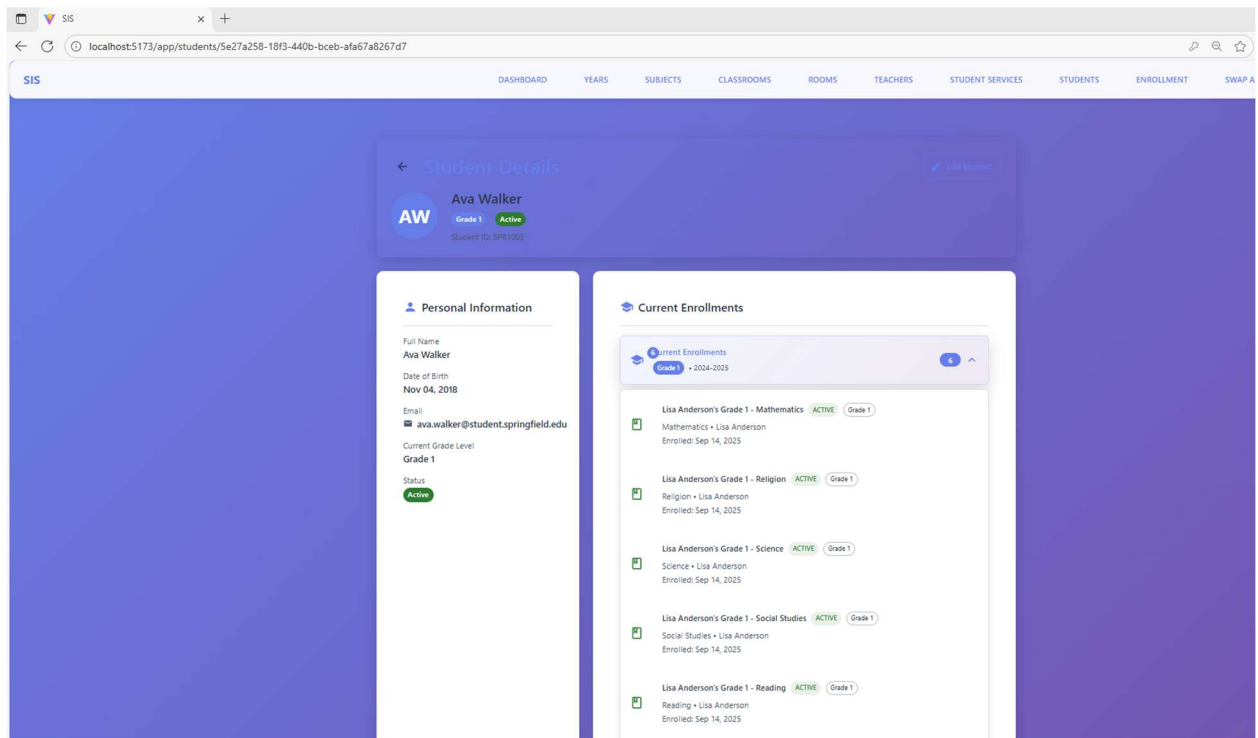

Select classroom and a ton of classes pop up.

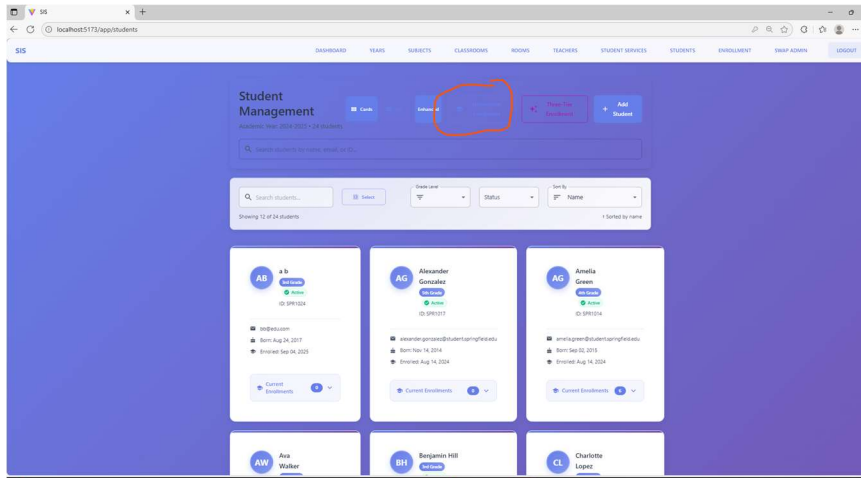

- Issues:
 - Core classes for gradeschool should not be an option. They should only be allowed at homeroom level.
 - Classes outside of the grade should only be an option when single student not multiple

Student information page seems to be working well

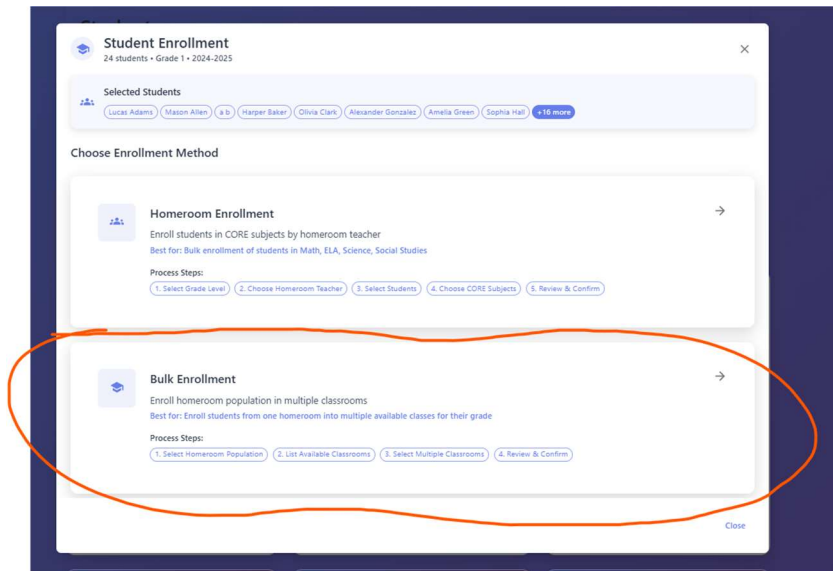

Bulk enrollment NOT homeroom has issues

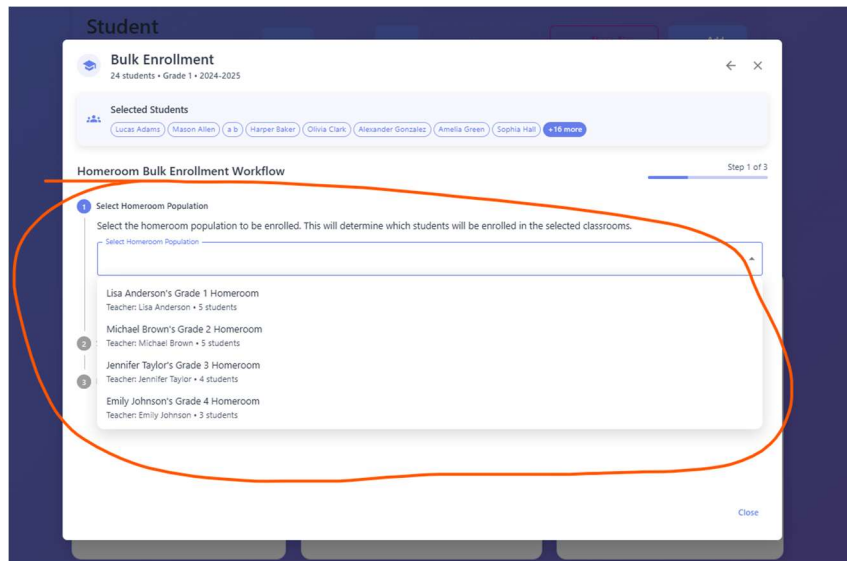

Select homeroom enrollment

Choose bulk enrollment

Choose homeroom

Only the room shows up for classroom and not the class itself. There are to gyms how would it know which class to sign them up for?

Issue: Only the classrooms with the appropriate grade level should be available and the grade should be on the display to ensure selecting the correct class. Gym will have 8-16 or more to accommodate multiple grades and classes per grade.
